SILICONE TOP BANDS

Manifattura Cantù Egizio sas

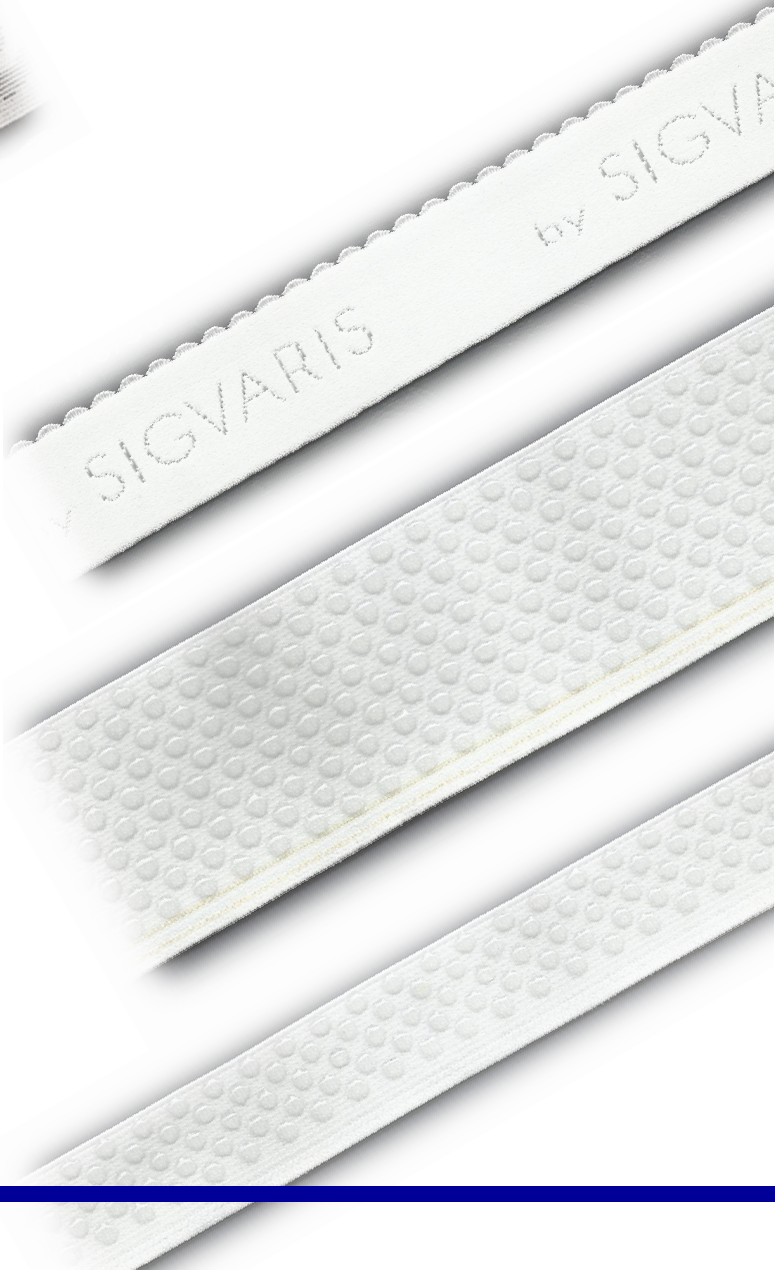

dal 1958

SILICONE TOP LACES

elastic top laces for medical compression stockings.

Wide range of laces suitable for the production of thigh-highs stockings.

SILICONE TOP BANDS

elastic top bands for medical compression stockings class 1-3.

Flat dimples are hardly noticeable.
Since the silicone dots are coated intermittently, the skin can breathe easily.

Art. 4336/43

Elastic waist band, suitable as a hip attachment belt for therapeutic stockings.

Art. 4462/14

Inguinal elastic edging, suitable in the single-leg therapeutic stockings.

It's extremely lightweight and soft.

Used as edging, prevents the skin from abrasions caused by rubbing.

ELASTIC BANDS

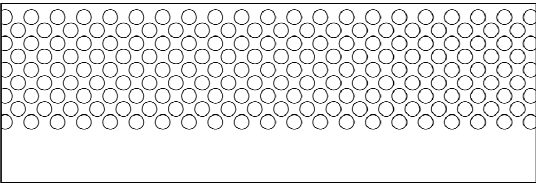

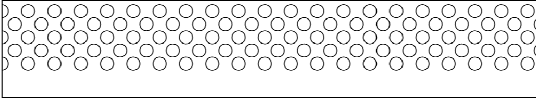

elastic bands for therapeutic stockings

Elastic bands suitable for the production of single-leg stockings.
